IDHAM HAKIM BIN MOHAMAD NIZAM

AI Solution Executive | SAP Business One | Python & SQL Server | AI Assistants & Automation

Kuala Lumpur, Malaysia | idhamproaqw98@gmail.com
GitHub: github.com/ezzzy01 | LinkedIn: linkedin.com/in/idham-hakim-29b676270

PROFESSIONAL SUMMARY

AI Solution Executive building AI and automation tools for SAP Business One. Designed and built a self-hosted AI assistant and management dashboard that gives staff secure, plain-language access to live ERP data, and a database-driven quotation and Outlook email system used for 17–18 SAP Business One maintenance clients. Background in enterprise IT support and managed services, with hands-on experience in Python, Microsoft SQL Server, Snowflake, Talend, Tableau, Amazon Redshift and UiPath. Bachelor of Information Technology (Hons) in Software Engineering, CGPA 3.50.

WORK EXPERIENCE

AI Solution Executive (K-Youth Programme) Sep 2026 – Present

MBP Solutions (TFP Group), working under TFP Digital Sdn. Bhd. (formerly SBOne Solutions Sdn. Bhd.), Kuala Lumpur

SAP B1 AI – AI Assistant and Management Dashboard for SAP Business One

- Built a self-hosted AI business assistant, similar to SAP Joule, using Python (FastAPI), Microsoft SQL Server and the SAP Business One Service Layer API, letting staff ask about live sales, customer, stock, receivables and order data in plain language and get answers, charts and reports.
- Delivered a management dashboard (sales trends, sales by item group, top customers and items, receivables ageing, open orders, stock status) with filters, on-demand refresh and an offline copy for when the SAP server is unavailable.
- Secured ERP data with a read-only database login, role-based access for sales, finance and management, a sign-in portal, human approval before any SAP B1 draft document is created, and a hard block on the live production company.
- Automated nightly data synchronisation, stock reorder planning, sales forecasting, unusual-transaction checks, a PDF management report pack and mobile stock alerts; built for multi-company use and hosted on Linux using Docker, Caddy, systemd and Tailscale.

TFP Digital Quotation & Mailer – SAP Business One Annual Maintenance Quotations

- Built a Windows desktop application (Python, Tkinter, Microsoft SQL Server) that generates branded Word and Excel annual maintenance quotations for 17–18 SAP Business One clients, replacing manually prepared Excel quotations.
- Added bulk editing of dates, currencies and validity periods, support for all ISO 4217 currencies, and digital signature upload with automatic background removal.
- Built a companion Outlook mailer with Quotation, Reply and Compose modes, sending branded HTML emails with templates, attachments and automatic CC, plus reply tracking that stops reminders to clients who have already replied.
- Added save-conflict detection, an encrypted saved database password (Windows DPAPI) and draft review before sending; packaged both tools as standalone Windows applications with PyInstaller.

IT Support Technician (Internship) Sep 2025 – Feb 2026

Q At Work (QAW)

- Ran twice-daily health checks (6 AM and 2 PM) on Talend Remote Engine, Tableau and Snowflake across two client environments (FGEN and CFC), logging results in structured duty patrol sheets.
- Monitored 8 business-critical Tableau finance dashboards (Accounts Payable, Accounts Receivable, Budget, COE, Executive Summary, Record-to-Report, Tax, Treasury) by cross-checking job failures in Talend Management Console.

- Wrote and ran Snowflake SQL queries for daily credit-usage breakdowns and weekly Frostwatch reports to track cloud data platform costs.
- Operated UiPath RPA workflows to run weekday and weekend PLI reports, reconciling SAP and Amazon Redshift row counts to confirm data parity and flagging mismatches for review.
- Handled around 50 support tickets a week and produced weekly support and KPI reports from Freshservice (SLA compliance, new, resolved and carry-over tickets) and monthly AMS DataOps reports covering availability, SLA, P1 incidents, change registry, CSAT and invoices.
- Coordinated L1/L2 handovers across three daily shifts via Microsoft Teams and Google Chat, and automated CSAT survey distribution using mail merge.

Technician (Internship) Mar 2021 – Jul 2021

Kejuruteraan Perkasa Jaya Zic

- Carried out maintenance of fire alarm systems for client premises.
- Serviced fire extinguishers and prepared their certification for BOMBA (Fire and Rescue Department of Malaysia) compliance.

EDUCATION

Bachelor of Information Technology (Hons) in Software Engineering Sep 2022 – Feb 2026

Universiti Kuala Lumpur Malaysian Institute of Information Technology (UniKL MIIT) | CGPA 3.50 | Dean's List: Semesters 3, 4 and 6

Diploma in Computer Engineering Jul 2019 – Jan 2022

Management and Science University (MSU) | CGPA 3.38 | Dean's List: Semesters 2, 4 and 6

ACADEMIC PROJECTS

- **Darnoc IT E-Commerce** (Final Year Project; PHP, MySQL): online store for IT products with trade-ins, a custom PC builder with compatibility checker, order tracking, and an admin dashboard with sales analytics and inventory tracking.
- **Student Borrow System** (Java, MySQL): equipment borrowing for student residences with reservations, due-date notifications and automatic overdue penalties.
- **Zen Birthday App** (Flutter, SQLite): hall booking mobile app with availability checks, booking management and conflict handling.
- **Riing Catering** (HTML, CSS, JavaScript, PHP, MySQL): online catering ordering system with order tracking and an admin dashboard.

SKILLS

Programming: Python, SQL, Java, PHP, JavaScript, Dart, HTML, CSS

Frameworks & Libraries: FastAPI, pandas, Tkinter, Flutter, ASP.NET MVC, Bootstrap

Databases & Data: Microsoft SQL Server, MySQL, Snowflake, Amazon Redshift

ERP: SAP Business One (SQL database, Service Layer API, multi-company setup)

AI & LLM: AI assistants and agents, LLM tool integration, Open WebUI

ETL, BI & Automation: Talend Studio, Talend Remote Engine, Tableau, UiPath (RPA), Microsoft Outlook automation (pywin32)

Infrastructure & DevOps: Linux, Docker, Caddy, systemd, Tailscale, Git, GitHub, PyInstaller

Tools: Freshservice, Amazon WorkSpaces (virtual desktop), Microsoft Office (Excel, Word, PowerPoint)

Languages: Bahasa Melayu and English (written and spoken)
